Pages: 198

**Exposing Ron and Xenu**

An exposé on the deception of Scientology, from the central ‘engram’ of intergalactic warlord “Xenu” and his thetans, to the Sea Org and its billion-year contracts to “clear” the universe.

What should be clear to any reader is the utter madness of this religion, and the dark, conniving personality of its founder L. Ron Hubbard, who in the end absconded to a Californian ranch.

\*\*\*

**Preface (pp. 11-19)**

“Scientology is a marvellous thing if it weren’t for the people who run it.”

It is an “applied religious philosophy in its highest meaning as it brings man to total freedom and truth.”

DMSMH is Dianetics, Modern Science of Mental Health.

Auditing is listening; its purpose is to create a *clear*.

*Charge* is mental energy phenomenon and manifests as anger, fear, grief, apathy, or suicidality. Each resulting incident is an *engram*.

All engrams form the *reactive data bank*.

As long as an engram is not fully viewed, it can restimulate, causing a charge.

Hubbard was born 1911 in Nebraska.

He wrote DMSMH in six weeks, and his mission was to “clear the planet”.

## **I) The Beginning of Scientology (pp. 21-36)**

E-meter is “electropsychometer”.

Hubbard: “The auditor who insists on auditing the current lifetime only, when he has the whole track technique available, is wasting time and effort.” [p23]

When the issue of past live was investigated further it was found ... to extend over ... sixty trillion years. Later research showed ... in excess of four quadrillion years ... This is what Hubbard called the **whole track**.” [p23]

The E-meter compares, “to looking through a quartz stone.”

There are 194 Axioms of Dianetics.

The thetan has existed forever and is neither man nor soul; a wanderer from one body to the next.

An Operating Thetan is one who acts as a thetan, not a body.

An engram is a mental video recording.

There is the thetan, his entities, and the Genetic Entity.

## **II) A Fateful Church (pp. 37-56)**

HASI is Hubbard Association of Scientologists International.

In 1954, Hubbard created the Church of Scientology in Washington, D.C. From 1954 to 1959, he issued 180 policy letters.

Hubbard held 70% of illness was psychosomatic.

In 1959 he went to England and bought St. Hill Manor.

In 1965, Victoria banned Scientology.

HCOPLs are Hubbard Communications Office Policy Letters.  
SPs are “suppressive persons”.

A PC is a “pre-Clear”.

The Guardian’s Office was formed in 1966, tasked with investigating psychiatry, the FBI, CIA, and exposing them in the press.

For his Sea Organisation (1967-77), Hubbard bought the *Apollo* to cruise the Mediterranean. He later added two more vessels.

From 1969 the *Apollo* was being banned from ports.

In 1977, the Sea Org bought the hotel Fort Harrison in Clearwater, Florida, which became the “Mecca of standard tech”.

Sea Org: “first this planet, then this sector of the galaxy, then the universe.”

A Clear has no self-created masses or ridges.

75mya, Galactic ruler Xenu over 21 suns and 76 planets trapped b billions of thetans and used drugs and electric shock to implant memories. He then transported them to Earth and blew them up in volcano craters using H-bombs. This is *the* basic engram on Earth’s time track. [p47]

OT I to II levels promised abilities like walking on water, lifting objects by mind, and creation *ex nihilo*.

In 1980, Hubbard disappeared to a secluded Californian ranch, and died 1986, aged 75.

### **III) Religious Salesmanship (pp. 57-66)**

Scientologists pay fees since they are scared to lose their Bridge and burn in hell forever.

“International Management” (Int) in LA are seven executives who call the shots. Their objective is to “get the stats up”.

Even a single Dianetics sold could save the neck of a struggling staffer (he may even buy it himself!).

Scientologists can work 70 hour weeks in a high pressure system : “high purpose, low pay”.

Contracted staff have 2.5-5 year contracts, Sea Org members 1B years.

Going up the Bridge is the only hope to escape compulsory Earth reincarnation.

#### **IV) Sectarianism (pp. 67-74)**

In 1983, the RTC was reformed and hundreds of old Scientologists were declared SPs.

#### **V) The ‘Technologies’ of Scientology (pp. 75-126)**

-Study tech: how to study for hours with full comprehension. Word misunderstanding and lack of ‘mass’ (i.e., having a clear picture of something) are barriers.

-Admin tech.

-Ethics tech.

-Auditing tech.

Chronic charge: “the impulse to withdraw from that which can’t be withdrawn from.”

ARC: Affinity, Reality, Communication

#### **VI) The Key Terms of Auditing: Engrams, Implants, and GPMS (pp. 127-190)**

Incidents themselves are not engrams, their recordings are.

“ ‘the static’, we refer to him who is ‘before the beginning’ ”. [p136]
